SUMMARY

Software Engineer with experience developing full-stack web applications using React.js, Next.js, Node.js, MySQL, and AWS. Built and delivered 15+ client projects across healthcare, education, real estate, and e-commerce domains while contributing to healthcare management systems serving 20+ dental clinics. Strong foundation in software engineering, databases, APIs, and scalable web application development.

SKILLS AND CERTIFICATIONS

Programming Languages: C, Python, Java, JavaScript, SQL

Frontend: React.js, Next.js, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, Django, RESTful APIs, FastAPI, JWT, Authentication & Authorization, WebSockets

Databases: MySQL, PostgreSQL, MongoDB, Database Design, Query Optimization

AI & ML: NumPy, Pandas, Matplotlib, Seaborn, NLP, Computer Vision, Machine Learning

CS Fundamentals: DSA, OOP, SDLC, System Design, CI/CD

Cloud and Tools: Linux, Git, GitHub, AWS (EC2, S3), Docker, Power BI, Office 365, Vercel, Render, Hostinger, Google Cloud, Postman

Certificates: Oracle SQL, Kaggle Python, Cisco IT Essentials, IIT Bombay RDBMS

Soft Skills: Problem Solving, Team Collaboration, Multitasking, Communication

EXPERIENCE

Software Developer

National Dental Care Corporate, Hyderabad

April 2026-Present

- Developed and maintained responsive web applications using HTML5, CSS3, JavaScript, React.js, and Next.js, improving user experience and platform performance across 20+ National Dental Care branches in India.
- Designed and implemented RESTful APIs for patient management, appointment scheduling, and administrative workflows using Next.js.
- Optimized SQL queries and database operations, reducing application response times and improving system reliability.
- Responsible for end-to-end development and maintenance of the website and hospital management platform.

Software Developer | Freelance

AVM Creative Shark, Hyderabad

Mar 2025-Present

- Delivered 15+ responsive business websites across healthcare, education, real estate, and e-commerce domains using modern web technologies including MERN Stack, WordPress and Shopify, ensuring high performance, usability, and alignment with client requirements.
- Collaborated with cross-functional teams to deliver digital solutions that enhanced online presence and business growth.
- Collaborated with developers, founders, and stakeholders to deliver solutions aligned with business objectives.

Python Intern

Defence Electronics Research Laboratory (DLRL), Hyderabad

May 2024-June 2024

- Implemented Fourier Transform data processing using Python with NumPy and Pandas to analyze and transform electronic signal datasets.
- Optimized signal processing by replacing FT with FFT, reducing computation time by approximately **70%** for large datasets.
- Visualized signal frequency patterns and transformation results using Seaborn to support data interpretation and analysis.

EDUCATION

MATRUSRI ENGINEERING COLLEGE, Hyderabad, India

July 2025

Bachelor of Engineering in Computer Science and Engineering | 7.9 CGPA

PROJECTS

AI-Powered Chatbot | [Live](#)

Jan 2026

- Built an AI-powered chatbot using React.js and Flask, integrated with Gemini API to deliver intelligent responses with <2s response latency.
- Implemented secure API communication, context-aware prompt handling, and error management to improve accuracy and user experience.
- Deployed the application on Vercel with optimized API communication and scalable architecture.

Synthetic Dataset Generator Website | [Live](#)

Aug 2025

- Built a web application using React.js and Python to generate customizable synthetic datasets for ML model training and testing.
- Generated schema-driven synthetic datasets supporting 10+ configurable attributes for ML training and testing.
- Implemented schema-based dataset configuration enabling users to create structured datasets for ML model prototyping.
- Deployed the application on Vercel to enable fast and scalable access for users.

PingsLanding – DDoS Protection System

June 2025

- Built a distributed DDoS detection platform using Go, Redis Streams, Python, Docker Compose, and Prometheus for real-time traffic monitoring and attack detection.
- Designed an interactive monitoring dashboard for real-time traffic analytics, attack visualization, and security event tracking.
- Trained a Random Forest model on network traffic datasets, achieving 98% classification accuracy for DDoS attack detection.

ACHIEVEMENTS

- **Leetcode** – Solved 100+ data structures and algorithms problems on LeetCode. | [Profile](#)
- Technical Team Member at the Devcatalyst college community and participated in inter-college and intra-college hackathons.
